Frontend

Vue.js · JavaScript · TypeScript · Angular · React Native · HTML · CSS · Bootstrap · jQuery · AJAX

Tools & DevOps

Docker · Git · n8n · AWS · Heroku · Postman · Composer · Java

Languages

Serbian / Bosnian / Croatian	Native
English	Fluent
German	Intermediate
Spanish	Intermediate
Chinese	Beginner

Interests

In my free time I use a CNC laser to engrave and design wooden products, combining technology and craftsmanship into personalized pieces.

Summary

Full-stack developer with 5+ years of experience specializing in Laravel, Vue.js, and API integrations. I have built and maintained scalable platforms for international clients, including full Shopify, WooCommerce, and Amazon API integrations. Strong background in backend development, with additional work in frontend technologies, blockchain, and DevOps tools. I care about clean code, innovation, and continuous learning.

- **5+ Years** Experience
- **Full-Stack** Development
- **API** Integrations
- **Performance** & Automation

Experience

Software Developer

Sep 2025 — Present

PAJ UG, Germany — Remote

- Full-stack development on a GPS tracking and fleet management platform.
- Backend services in Laravel: REST APIs, business logic, and performance optimization.
- Frontend applications in Angular and mobile apps in React Native, with TypeScript across both.
- Integration and processing of real-time GPS data from tracking devices.
- MongoDB for scalable storage and location-based queries.
- AI-assisted development with Cursor, AI agents, and Codex to speed up delivery and improve code quality.
- NetBird for secure network access between development environments and services.
- Collaboration on system architecture, feature design, and performance improvements.

Full-Stack Developer

Jan 2023 — Aug 2025

Codefellas GmbH — Brand Canyon, Germany — Remote

- Laravel backend, Vue.js frontend, MySQL, Docker, and REST API architecture.
- Development and maintenance of brandcanyon.de and dashboard.merch.camp, and the lara.sosabrothers.de platform built from scratch.
- Shopify API integrations, starting with REST and later migrating to GraphQL for product and order synchronization.
- REST APIs for WooCommerce and the Amazon API for multichannel product sales and shop connectivity.
- n8n workflows for DecoNetwork, automating order processing and product synchronization.
- Stanley/Stella API integration to monitor stock levels and automate product availability.
- End-to-end backend in Laravel and frontend in Vue.js, with structured data in MySQL.

Full-Stack Developer

Jul 2021 — Jan 2023

Digital Asset Management LLC, Banja Luka

- Daily work with Laravel, Laragon, PHP, MySQL, JavaScript, Vue.js, Node.js, Git, HTML, CSS, AJAX, jQuery, Composer, Bootstrap, REST APIs, JSON, and Postman.
- Occasional React Native, Java, Android Studio, and Eclipse for mobile and cross-platform development.
- Hands-on work with blockchain technologies and cryptocurrency platforms.
- Web hosting and deployment with FTP, PuTTY, FileZilla, AWS, and Heroku.
- Code reviews and architecture discussions, plus monitoring and troubleshooting of production systems.
- Ethereum savings feature on the BCX platform, with Laravel on the backend and HTML on the frontend.
- Contribution to Lova.ba, a React Native app for digital payments and financial transactions.

Technical Support Specialist

Mar 2020 — Jul 2021

M:tel, Banja Luka

- Technical support for end users, resolving issues quickly so operations stayed uninterrupted.

Education

Graduate Professor of Mathematics and Informatics

2016 — 2020

Faculty of Natural Sciences and Mathematics, Banja Luka

Professor of Mathematics and Informatics track.

High School Gymnasium

2012 — 2016

Banja Luka, Bosnia and Herzegovina

Natural sciences and mathematics track.

Certifications

- Certificate for attending the camp of young programmers by Lanaco
- Certificate of the Association of Innovators
- Entrepreneurship training certificate
- Certificate for learning Chinese
- Certificate for learning English

Projects

Personal projects I designed and built from scratch.

Warehouse CMS

A full-stack warehouse management system built with Laravel and Vue.js. It covers inventory tracking, multi-warehouse management, procurement, role-based access, and reporting, with a responsive admin dashboard and a fully populated demo.

GEOIN Nekretnine

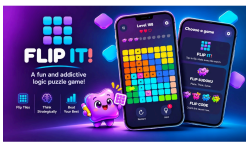
Designed and developed a modern, responsive real estate website in PHP, with AI-assisted development. It includes property listings, advanced search and filtering, a custom admin dashboard, and content management. I also deployed it and still host and maintain it.

My Perfect Party

React Native app for event planning. It covers guest lists and RSVPs, seating plans, expenses, tasks and checklists, invitations, statistics, and PDF export. I built the UI, app logic, Android release, and Google Play listing.

Dress Up & Makeup Girls

A Unity fashion and beauty game where players try outfits, makeup, and hairstyles to create their own looks. I handled the game development and visual styling for the Android release.



FLIP IT!

A React Native collection of logic puzzle games, built with AI-assisted development. Players match tiles, solve Sudoku, and crack a secret code.
